# 2026

[www.tawanatechnology.com](http://www.tawanatechnology.com)

# php

## **Week 01: introduction to php & web basics**

1. Introduction to php and its purpose in web development.
2. Installation of xampp / laragon and running php scripts.
3. Understanding client-server model and how php works.
4. Basic syntax, variables, data types, and echo/print statements.
5. Practice file: write your first php program “hello world!” And simple calculator.

## **week 02: control structures & functions**

1. Introduction to conditional statements (if, else, elseif, switch).
2. Loops in php (for, while, do...while, foreach).
3. User-defined functions – parameters and return values.
4. Working with arrays (indexed, associative, multidimensional).
5. Weekly quiz or practice file – create a function-based student marks calculator.

## **week 03: working with forms & files**

1. Handling html forms with php using `get` and `post`.
2. Validating form inputs (required fields, email, numbers).
3. File handling – create, read, write, and delete files.
4. Introduction to php superglobals (`$_post`, `$_get`, `$_server`, `$_files`).
5. Weekly quiz or practice file – build a simple “contact form” that saves data in a file.

## **week 04: php with mysql database**

1. Connecting php to mysql using `mysqli` or `pdo`.
2. Performing crud operations (create, read, update, delete).
3. Displaying database data in html tables.
4. User login system using php session and mysql.
5. Weekly quiz or practice file – create a mini “user registration and login system”.

## week 05: advanced php concepts & final project

1. Introduction to cookies, sessions, and file uploads.
2. Error handling and form validation techniques.
3. Introduction to object-oriented programming (oop) in php.
4. Final project practice file – *build a mini “news management system” or “blog system”*.
5. Final exam or project presentation on **tawana website**.
